# Compliance Readiness
Onna

Onna can help ensure your organization is Compliance Ready

by providing a centralized platform for managing, discovering, and analyzing data from modern data sources including collaboration platforms such as Slack, M365, and Google Vault.

Connect & Collect   Centralize & Secure   Search & Identify

Centralized Data Management

- **Data Collection** - Onna integrates with multiple modern collaboration tools (Slack, Google Workspace, M365, Salesforce, and more) to collect and centralize information in one secure searchable dataverse.

- **Data Mapping** - Organize data for better understanding and accessibility, helping to easily identify potential policy violations in near real-time. Determine where high risk data exists and ensure it's preserved for analysis.

- **Real-Time Sync -** Enable automated data syncing between high risk collection sources for accurate and efficient compliance evaluations.

Enhanced Search & Discovery

- **Unified Search** - Allows legal and compliance teams to perform a comprehensive search across all connected platforms, ensuring no relevant data is overlooked.

- **Advanced Filtering** - Build granular filters that enable you to focus your compliance efforts on specific data points, helping identify compliance gaps or risk.

- **Real-Time Sync -** Enable automated data syncing between high risk collection sources for accurate and efficient compliance evaluations.

Compliance Monitoring & Auditing

- **Policy Enforcement** - Assists in monitoring for internal policy violations and external regulations through data analysis.

- **Audit Trails** - Provides detailed logs of data access and user activity to support audits and investigations.

- **Proactive Risk Detection -** Helps identify areas where the company may be out of compliance through automated search workflows that identify specific risk content across within specific data sources and users.

eDiscovery Readiness

- **Legal Hold Management** - Enables the preservation of data in the event of a legal event or compliance investigations.

- **Quick Response** - Accelerates responses to discovery requests by providing a centralized repository of potentially releavant information.

By simplifying data management and analysis,

Onna ensures organizations can quickly and effectively monitor at-risk data for internal policy violations and regulatory requirements. With your company's data in a centralized and secure repository, you can feel confident that your team can respond to compliance requests, investigations, and eDiscovery matters.
