Onna

a Reveal Technology

Transform Your Data into a Valuable Asset

Today's digital workplace is a complex web of collaboration tools and systems. The data generated by these modern business applications consists primarily of unstructured data making it increasingly difficult to extract insights.

231
Average # of apps at large organizations

80%
Percentage of data that is unstructured

20%
The small percentage of companies that are able to mine unstructured data

42%
Percentage of time employees spend using collaboration tools

With Onna, you have the power to build a centralized foundation for your enterprise data. Onna can help you reduce the risk of data sprawl while giving you the tools to mine your unstructured content for valuable insights.

Onna Connectors

Connect

Over 25+ Out-of-the-Box Connectors including Google, O365, Zoom, Dropbox. Can't find what you need in our connector library? We can design, develop, and deliver custom solutions for you using our open API.

Process & Search

Proactively prepare your data for Early Case Assessment (ECA) and review. Onna parses and indexes the data. Analyze, search, & build metadata filters or keyword searches to quickly identify insights or to cull data prior to collection.

Discover

Create an AI Data Pipeline for your organization so you can discover insights & elevate your decision making power.. Securely connect your digital workplace data to Large Language Models (LLMs) via Retrieval-Augmented Generation.
