Native and fully supported integration that is automated for an end-to-end data workflow	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Connection made by	Admin	Admin or legal professional through Onna Authorized Connections

	JSON import (Rec. for Bus+)	Enterprise
PROS	Cost effective, point-in-time view for Slack + users. Edits and deletes are captured.	Best solution for companies looking to access data for multiple use cases (eDiscovery, legal hold, internal investigations, compliance).
CONS	No auto-sync and archive available. Manual import of JSON.	Higher costs due to greater functionality.
